

Residential  
Booster

Boosts  
4G LTE

Supports  
Multiple Users

The Fusion4Home is a five-band booster that provides 2G, 3G and 4G enhancement for all carriers. The Fusion4Home can cover homes that are up to 2,000 square feet.

All Fusion4Home kits include a signal booster, an outside antenna, an inside antenna and RG6 coax cable.

### FEATURES

- Boosts Talk, Text and 4G LTE signals for all carriers inside a home or office
- Reduces dropped and missed calls and provides faster, more reliable 4G LTE data performance
- Highest 4G data rate in the industry
- All carrier frequencies are independently controlled
- Quality metal construction, durable and resilient
- Offers the industry's best three year warranty

Configurable for all indoor environments, Fusion4Home is available in two kit configurations.

Model SC-PolyH-72-YRA-Kit: 1 Outdoor Yagi Antenna, 1 interior right angle<sup>1</sup> antenna and 50' RG6 coax cable

Model SC-PolyH-72-YP-Kit: 1 Outdoor Yagi Antenna, 1 interior panel antenna<sup>2</sup>, 20' and 50' RG6 coax cable

1. Right Angle direct connect inside antenna provides coverage 2-3 rooms
2. Panel inside directional antenna provides targeted in-building coverage

Note: Optional inside ceiling Dome antenna is best for areas requiring 360° coverage
